

# SCUFFMASTER + South Coast AQMD

## Our Commitment to You

Scuffmaster is committed to producing the highest quality, green, products all without environmental compromise. With the South Coast AQMD changing its VOC requirement, to less than 50 g/L for paint, Scuffmaster has reformulated its products creating a line of finishes applicable in the Southern California market. For the time being, these changes only apply to products sold in Southern California. All other Scuffmaster products will continue to meet LEED requirements for their respective class.

Performance and application in these reformulated products will maintain the high standard you've come to expect from Scuffmaster paints as long as Masterlink™ is used. If the Masterlink™ additive is not used, there might be slightly diminished performance in terms of durability.

Scuffmaster products not on this list did not require and formulae adjustments.

Product	MCT Action	SCAQMD Requirement	Result	Label Requirement
SCRUBTOUGH	Formula Adjustment	< 50 g/L	Less Freeze / Thaw Stability	Sticker Over Analysis
MASTER COAT 100	Formula Adjustment	< 50 g/L	Less Freeze / Thaw Stability	Sticker Over Analysis
PREMIUM COAT 200	Formula Adjustment	< 50 g/L	Less Freeze / Thaw Stability	Sticker Over Analysis
ULTRA-CLEAR	Formula Adjustment	< 50 g/L	Less Freeze / Thaw Stability	Sticker Over Analysis
CLEAR PEARLCOAT	Formula Adjustment	< 50 g/L	Less Freeze / Thaw Stability	Sticker Over Analysis
PRIMEMASTER	Formula Adjustment	< 100 g/L	Less Freeze / Thaw Stability	Sticker Over Analysis
BONDING PRIMER	Formula Adjustment	< 100 g/L	Less Freeze / Thaw Stability	Sticker Over Analysis
