

LEED + SCUFFMASTER

The Ultimate Green Paint System

On the surface, Scuffmaster invigorates your favorite color. At its core, Scuffmaster defines environmental performance. Presenting a range of water-based, low VOC, polyurethane formulations that match any color, from any fandeck. Begin with an eggshell that recorded 8000 ASTM scrub cycles and checks in with less than 50G/L VOC. Add a silky pearlescent. A bold water-based metallic. And three light-altering textures all exceeding LEED standards. This is Scuffmaster. The ultimate paint, the ultimate GREEN paint system and the best finish option for every project.

LEED Credits Achieved by Scuffmaster

All Scuffmaster finishes satisfy **LEED Credit EQ 4.2** — Environmental Quality, Low Emitting Paints and Coatings. (1)

Scuffmaster may also help satisfy these LEED Credits for projects located within 500 miles of Minneapolis, Minnesota.

- › **LEED Credit — MR 5.2** — Materials and Resources, Extracted and Processed Locally (1)

Life Cycle and Cost Comparison

This example compares SCRUBTOUGH eggshell with two leading contractor-grade eggshell paints. The results show if you need to repaint one time more often because the lower quality product selected, you've nearly doubled your cost and will end up emitting more VOCs during the repaint.
